Trimble SketchUp Pro 2020

SketchUp users are architects, designers, builders, makers and engineers. They are the people who shape the physical world. They are important, and they deserve great tools because great tools produce great work.

Great tools are ones you look forward to using. They do one thing (or maybe two) really, really well. They let you do what you want without having to figure out how. They help with hard or boring tasks so that you can focus on being creative, or productive, or both. And they are, in their own way, beautiful.

At SketchUp, we do our best to make great tools for drawing. For our users, drawing is thinking. They draw to explore ideas, to figure things out, to show other people what they mean. They draw because they love it, and because nothing great was ever built that didn't start with a great drawing.

SketchUp Pro 2020

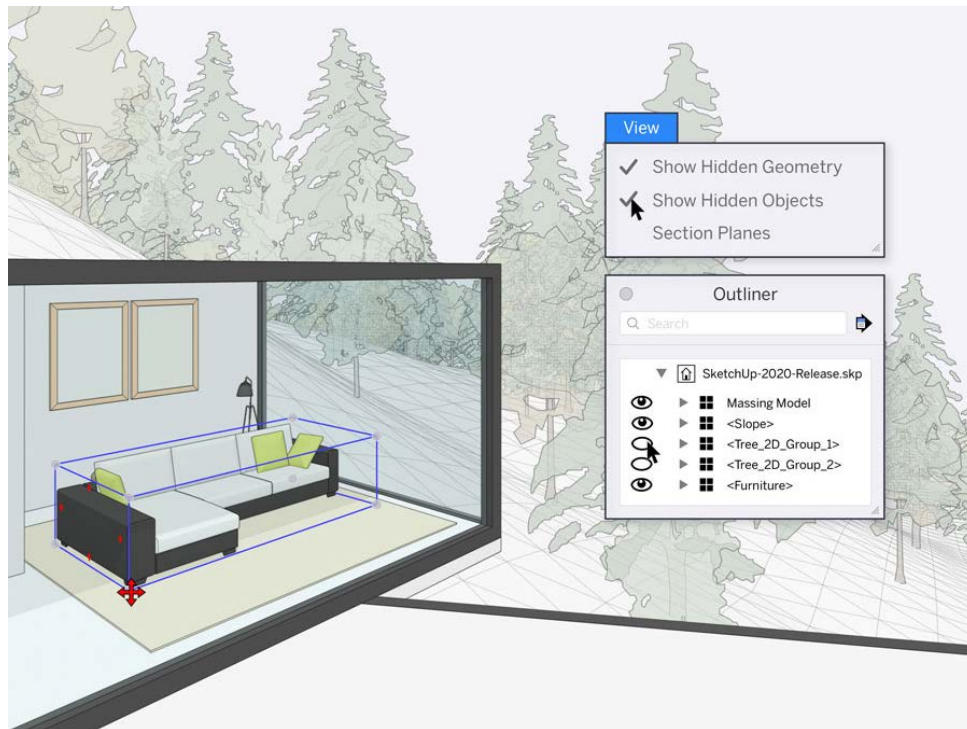

Welcome home to

SketchUp Pro 2020

Follow Me to a more efficient workflow.
From new ways to organize your model to custom viewports in LayOut, you don't want to miss this one.

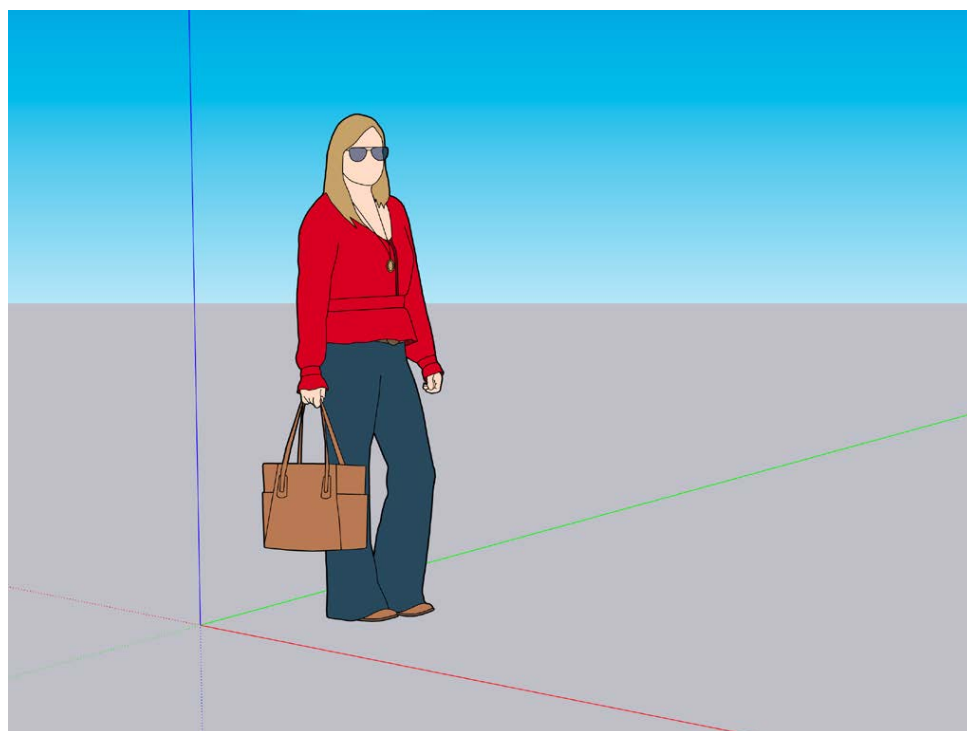

Click... release, and discover.

**It's all about that workflow:
Game-changer enhancements in 2020!**

We've spent a lot of time in 2019 learning more about what you, the user, wish SketchUp did better. We've been eyeing your comments on the forum and discussing ideas during our training events to see what trips up your workflow. So, thanks for speaking up! You helped us discover how you're using SketchUp and how we can improve your design process, resulting in workflow improvements galore! They're so good you'd think we'd been sneaking into design firms or something .

First thing's first: we have a new scale figure for SketchUp 2020. Before you go any further, meet Laura!

Now, let's dive into those updates.

SketchUp Pro 2020: your [3D] creative space

This year, we focused on data structures and modeling behaviors. We want to make sure we continue to be the more intuitive, easier (because we know no software is EASY) to use software that boosts your ability to crank out those stunning design

projects.

Outliner

This leads us to our BIG model organization change. In an effort to increase model performance, you no longer have to create Layers upon Layers. You can do your main model organization straight within Outliner. We recommend using this (and our friendly eyeball icon) to toggle between the major chunks of your model like main floor plans.

Check out this *Quick Win* to learn more about how to use it.

Grips on bounding boxes

Grab that sofa and put it in the corner! Just try it out, we need not explain more.

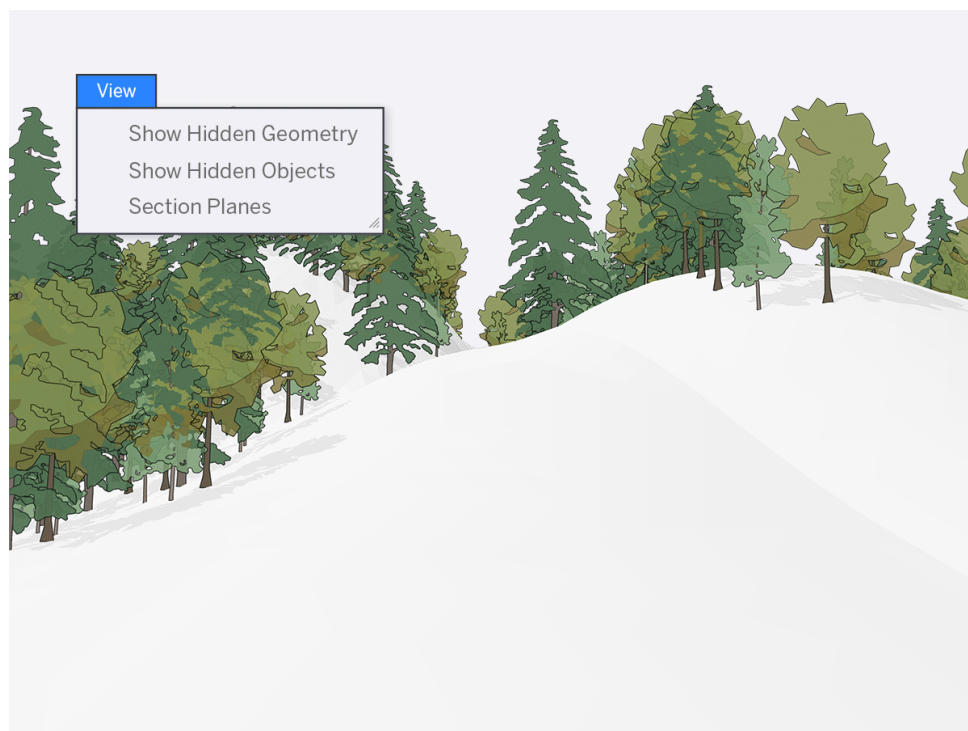

When you grab a point that is obscured in an object (like a back corner or a center point) and start to move it, your object will automatically go transparent as soon as something in your model interferes with the object you are moving. This works with both the Rotate tool and Move tool. Fancy, huh? This will literally 'transform' your workflow. Don't take our word for it: start positioning those objects in hard to reach places to see that SketchUp magic!

Check out these Quick Wins to learn more:

- *Moving with Grips*
- *Toggling Grips*

Hidden objects

Announcing a big change to hiding objects in your models! You'll notice in your drop-down menu that we decoupled hiding objects from hiding geometry. How will this change your workflow? Well, this will give you the ability to better manage hidden geometry and hidden objects for an even easier modeling experience. For example, let's say you want to edit hidden edges in a landscape or smoothed surface, but you still want to be able to hide objects that are nearby (like trees, bushes, or a building)... yes, you can do that in SketchUp! Landscape architects, rejoice!

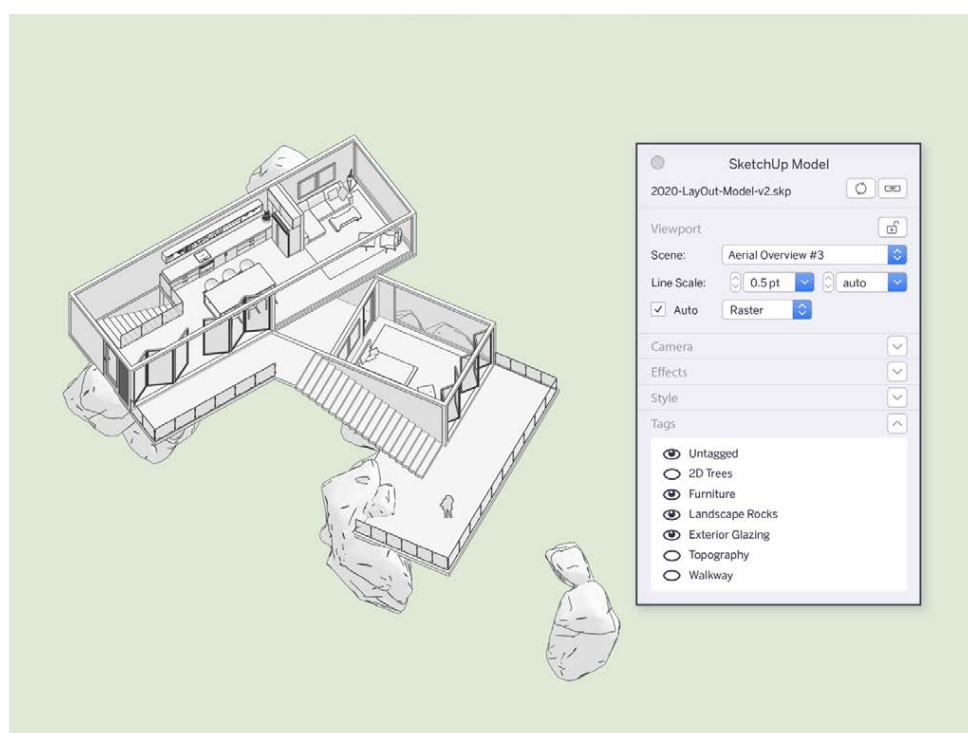

The SketchUp Universe: nomenclatures

After many conversations, we decided to update some of our naming conventions. This won't change your workflow, but we want you to know that it's not just you — we are talking about a few things differently now. We think they make logic a little more prevalent.

Objects are now a collective term for groups, components, and dynamic components. This just means we don't have to say "groups (slash) components" anymore. Now you can save those syllables for words like "stupendous" and "dapper" (Why, thank you! We think you are too.). Also, Layers are now referred to as "Tags". Don't worry these two terms are merely document naming conventions and won't hinder your workflow.

LayOut 2020: document control

It's all about taking back control... document control that is! We focused on improving the interaction between SketchUp and LayOut to save you time and [brain] energy. Way less going back and forth updating scenes in SketchUp to ensure your drawing comes out perfectly. Now you have more editing ability right in LayOut.

Model Views

LayOut now understands a lot more about your SketchUp model and what you've overridden. Meaning, you can safely change a style or camera angle directly in LayOut without accidentally losing your changes (winning!). How do you know what's different in your LayOut viewport versus your SketchUp model, you ask? When you make changes in LayOut, parts of the menu bar will go dark gray, alerting you that you've made an override. Don't worry, just because you made some changes in LayOut, doesn't mean you're stuck with those. You can always resync your viewports back to your SketchUp model if you need to.

Customization

Take those LayOut docs to the next dimension with different models and views. If you have one SketchUp model that exists across several viewports, you can now relink just one of those viewports to another SketchUp model. Previously, you would need to delete that viewport, insert a new SKP model, and reset all your scale settings and viewport sizing. More efficient now? Yes!

And that's not all folks! You also have the ability to toggle tag visibility — straight in your LayOut doc! What does this mean for my workflow? This means you don't have to create extra scenes just for your LayOut files, saving you a ton of time going back and forth between LayOut and SketchUp.

Check out our *Skill Builder* to learn how this will speed up your LayOut workflow.

SketchUp Conversion Promotion - Terms and Conditions

Classic Single user License to 2-Year Subscription

Customers with eligible perpetual licenses have the option to convert to a [2-year] SketchUp Pro subscription for a discounted price.

Subscribing is a more flexible way to access SketchUp software, allowing for more effective budgeting and simpler management for teams. With a subscription, you have access to a larger suite of tools to enhance design workflows and additional capabilities delivered through Trimble's cloud services. Additionally, you will have access to new features and releases as they launch.

Commercial single user SketchUp Pro licenses can be submitted to receive a 53% discount on an equal number of SketchUp Pro subscription seats. Please note the below considerations:

- You may still use your perpetual license (and install it on new devices if you have available activations)
- Active Maintenance and Support plans will be terminated upon convert and plans cannot be reinstated
- You must agree to the full Terms and Conditions below
- Your [2-year] subscription term will begin on the day of conversion
- Subscription renewals will not be at a discounted rate

To convert to subscription, please contact us with your license details.

With a subscription, you get SketchUp Pro 2020 for desktop plus full use of:

- Trimble Connect with unlimited cloud storage
- SketchUp for Web premium
- Viewer apps for HoloLens, VR and Mobile

For each eligible SketchUp Pro perpetual license, instead of purchasing Maintenance and Support, a customer may purchase a single 2-year SketchUp Pro subscription with a 53% discount on Trimble's suggested retail price. A participating customer will retain the ability to use the SketchUp Pro (Classic) license, without the ability to receive Maintenance and Support. A customer may purchase up to a maximum of 50

discounted subscription seats as part of this promotion.

A perpetual license must meet all the following requirements to be eligible:

1. Perpetual Single user license of SketchUp Pro (Classic)
2. Has not previously been used in any subscription promotion
3. Is the most recent serial number (if previously upgraded/auto-upgraded)
4. Is a registered commercial version
5. Has a Maintenance and Support plan that **is active or expired not longer than 3 years** prior to the date of conversion;
 1. Example a. Maintenance and Support term expires in 2 months: **Is eligible**
 2. Example b. Maintenance and Support term expired 2 years and 3 months ago: **Is eligible**
 3. Example c. Maintenance and Support term expired 3 years and 1 day ago: **Is not eligible**
6. Is being used by a customer in the Nordics only (Customers in other regions are not eligible)

No other license types qualify for the promotion. Each perpetual license may only be converted once.

What is the “Conversion Expansion” promotion for perpetual (Classic) Single user Licenses?

A user may purchase subscription seats in addition to those converted as part of the “SketchUp Conversion Promotion” at a discount of 21% for a 2-year term. A user may receive a discount on up to 4 subscription seats per converted perpetual license up to a maximum of 50 discounted subscription seats in total, as part of both promotions. Subscription renewals are not discounted.

- Example d. A customer with a 2 SketchUp Pro perpetual Single user licenses:
 - User may purchase up to 10 discounted seats in total
 - Up to 2 (2x1) 2-year subscription seats with a 53% discount;
 - Up to 8 (2x4) 2-year subscription seats with a 21% discount

The promotion runs now from May 14, 2020 through to April 2, 2021!

Can a SketchUp Pro perpetual license be converted to a different Trimble product under this promotion?

No, the promotion is valid only on 2-year subscriptions of SketchUp Pro. It is not valid for use on other products or for alternative licensing options.

Will the promotional pricing apply to subscription renewals?

No, the promotional pricing may only be used for the initial term of the subscription and is not available for any subscription renewals.

What happens to the remaining term of Maintenance and Support?

The Maintenance and Support contract of the perpetual license is terminated as of the date of conversion and cannot be reinstated at a later date.

Can the customer still use their classic single user license after conversion?

Yes, it's not quite a full trade-in. **The customer can continue to use their classic license** alongside the subscription

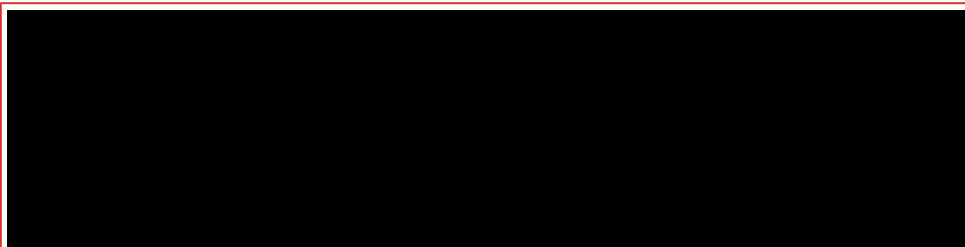

What is the license conversion process?

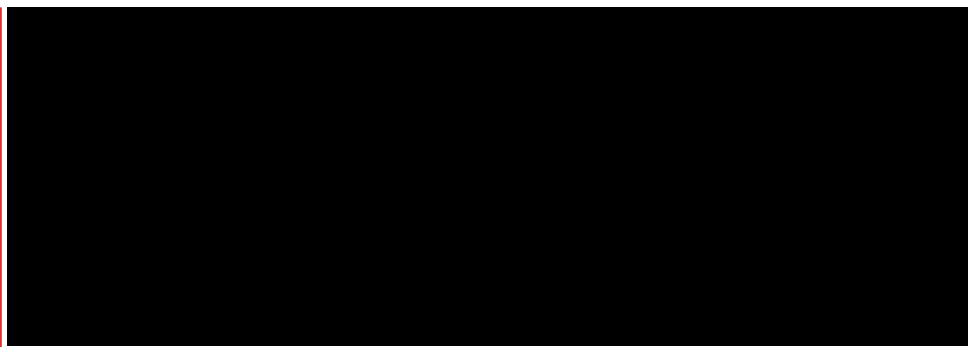

1. Customer submits its license (s) and other applicable information to the authorized reseller in its region (customer name, serial number/s, and registered email address)
2. The reseller confirms eligibility with the customer
3. Customer agrees to these Terms and Conditions
4. Customer purchases discounted subscription (s) through the reseller
5. Perpetual license is registered on Trimble systems as converted

Perpetual serial number(s) to convert - separated by comma	
Name	
Email	
Company	
I agree to the terms and conditions	Yes / No (delete as applicable)
Signature	
Date	

Miscellaneous Terms and Conditions

- The promotion is subject to Trimble resellers' participation. Trimble resellers are unaffiliated and set their own prices. Advertised savings are based on the Trimble suggested retail price (excluding taxes and/or any other applicable fees) for a single SketchUp Pro subscription in and is used for reference purposes only. Actual pricing may vary by region and is subject to exchange rate fluctuation;
- This promotion may be combined with Trimble's '*SketchUp Expansion promotion*' only. It may not be combined with any additional offer.
- Trimble reserves the right to modify or cancel, part of or the complete promotional offer without notice, at its sole discretion for any reason.

Renewing the Upgrade

When you buy a SketchUp Pro license, you're enrolled in the SketchUp Pro upgrade, maintenance, and support program for one year. When you're active in this program, you have the following benefits:

- **Predictable upgrade expenses:** Within the year after your initial purchase, you can upgrade to the new SketchUp Pro version. After that first year, simply renew your license and enrollment in the upgrade, maintenance, and support program annually for predictable upgrade and support expenses.
- **The most current SketchUp Pro features:** When you stay enrolled in the upgrade, maintenance, and support program, you have access to all the power-packed improvements that come with each new version of SketchUp Pro — as soon as the new version is available.
- **Phone support:** In addition to the Knowledge Center, Help Forum, and email support, the program gives you access to phone support. If you're encountering an issue installing or authorizing SketchUp Pro (or any other issue with SketchUp Pro), let us know and we'll be happy to help out. Please refer to your email with the upgrade, maintenance, and support information for contact details.

If your Maintenance and Support Plan is already active then you can simply download the new version and apply your new license, which was emailed to you, to get started. Please refer to our Getting Started article for additional information.

Maintenance & Support Plan

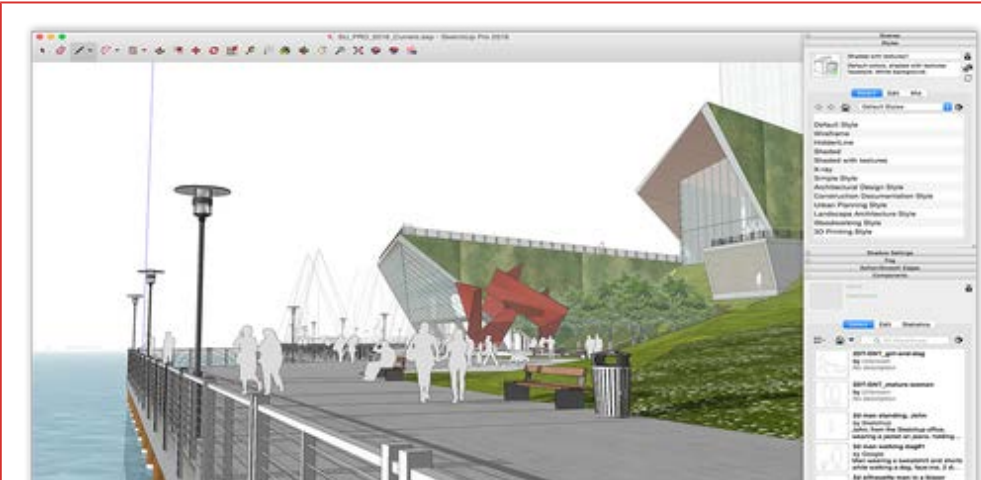

The Maintenance & Support plan gives you three great things for one year:

1. License upgrades for Major SketchUp Pro releases when they become available
2. Minor releases which include bug fixes
3. Access to our technical support resources

If you're buying a **new** SketchUp Pro "single-user" license, the program will automatically be included in your purchase. This cost will include the perpetual Pro license, plus one year of any new upgrades, maintenance, and support. This means that you would also receive an upgrade to the next major versions of SketchUp Pro when and if they become available at no extra charge (as long as your upgrade, maintenance, and support program is still active).

If you already have a SketchUp Pro license, you can purchase or renew this plan to get a license for the latest version of SketchUp Pro.

It's important to note that your SketchUp Pro license will always work for the version of Pro that you paid for. SketchUp Pro licenses will not stop working when your upgrade, maintenance, and support program expires.
