Acronis ExtremeZ-IP 9.0

Acronis

Acronis is a leading provider of easy-to-use disaster recovery and data protection solutions for physical, virtual and cloud environments. Its patented disk imaging technology enables corporations, SMBs and consumers to protect their digital assets. With Acronis' disaster recovery, deployment and migration software, users protect their digital information, maintain business continuity and reduce downtime. Acronis software is sold in more than 90 countries and available in up to 14 languages.

The rise of virtualization, the explosion of data creation and the opportunities Cloud services offer are bringing new challenges to maintaining effective backup and disaster recovery programs for critical data.

Acronis can help you securely migrate, protect and recover critical data wherever it resides in your physical, virtual or cloud environments. With a Unified Platform and next generation technology, its innovative solutions are designed to ease the management burden and reduce total cost of ownership, while improving your recovery time objectives.

ACRONIS® EXTREMEZ-IP 9.0

JUST
RELEASED!

New Acronis ExtremeZ-IP 9.0 for Super Fast File Search in NAS and Large-Scale Server Environments

Acronis is pleased to announce a new version of its enterprise-class software, ExtremeZ-IP, that seamlessly integrates Macs for use in a Windows based environment. This new version continues to provide access to file servers and NAS via trouble-free Apple Filing Protocol (AFP), now with Spotlight Search full-content searching of NAS volumes. This integration drastically reduces search rates to just seconds, increasing employee productivity.

Acronis ExtremeZ-IP is a must for any organization that wants to seamlessly integrate Macs into their Windows and/or NAS IT Infrastructure. With Acronis ExtremeZ-IP, Mac users can quickly and easily access the files they need from NAS and Windows file servers. Thousands of IT Administrators use Acronis ExtremeZ-IP to solve operating system incompatibilities inherent between Windows servers and Mac OS X. As a

result, their Mac users enjoy the same user experience, fast, secure and reliable access to shared files and printers as their Windows users. This leverages existing NAS and Windows file server investments and infrastructure.

Acronis ExtremeZ-IP 9.0 key features include:

- ✓ New Acronis Content Indexing option - enabling nearly instantaneous Mac OS X Network Spotlight search for file-name and content- reducing speeds from minutes to just seconds, even on remote servers and NAS
- ✓ Enhanced configuration and performance for popular network attached storage (NAS) solutions from EMC, NetApp, Isilon, Western Digital, HP
- ✓ Important updates for the latest versions Mac OS X and Windows Server
- ✓ Support for Network Spotlight search of StorNext file shares
- ✓ Certified for StorNext 5, a new version of Quantum StorNext, which is a popular migration path for XSAN customers

Acronis ExtremeZ-IP 9.0

Apple's traction in the enterprise is accelerating rapidly - the growth of Macs is far outpacing that of Windows PCs. The Mac has become a staple of the enterprise IT ecosystem and, as a result, access to enterprise file and print resources is now essential.

Mac computers offer a rich user experience that helps improve employee productivity and efficiency. And with Acronis ExtremeZ-IP, IT administrators can easily manage Mac users within their Enterprise server and storage environments. This drives higher productivity and efficiency for Mac users by opening up the enterprise to these users in a seamless and transparent way, while making life easier for IT administrators.

Product Overview

If Macs are a critical component of your IT infrastructure, you have probably struggled with ways to integrate them into your Windows file & print server environment. With Acronis ExtremeZ-IP, you get seamless integration with your existing Windows infrastructure, while maintaining the complete Mac experience end-users expect. ExtremeZ-IP is the perfect solution for allowing Macs and PCs to coexist and collaborate on your Windows based network.

This new version continues to provide access to file servers and NAS via trouble-free Apple Filing Protocol (AFP), now with Spotlight Search full-content searching of NAS volumes. This integration drastically reduces search rates to just seconds, increasing employee productivity. Acronis ExtremeZ-IP, enables Mac users to quickly and easily access the files they need from NAS and Windows file servers.

Thousands of IT Administrators use Acronis ExtremeZ-IP to solve operating system incompatibilities inherent between Windows servers and Mac OS X. As a result, their Mac users enjoy the same user experience, fast, secure and reliable access to shared files and printers as their Windows users. This leverages existing NAS and Windows file server investments and infrastructure.

Business Value

If your organization is one of the estimated 80% of enterprises which have Mac users in need of accessing files and documents in a mixed Mac-Windows environment, you know firsthand that Windows and Macs communicate with one another differently. While these communication issues manifest themselves in a number of ways, when Mac users try to access Windows file and print servers they typically experience performance and data integrity issues, and your business is impacted in many ways:

- Performance issues especially in the transfer of large files
- Mac users struggle with file corruption, file permissions, application incompatibilities and files disappearing
- Mac users experience issues with the same access to file and print resources as PC users
- Inability to access virtually any file server or NAS storage device within the enterprise
- Maintaining the integrity of the Mac experience in Windows environments, such as Time Machine backup and Network Spotlight full content search.
- All of these issues result in high levels of help desk calls.

ExtremeZ-IP enables enterprises to simply, seamlessly and transparently make content and files - on Windows servers and NAS storage - accessible to Mac users. And it will bring your Mac users to a whole new level of access and productivity.

The Benefits of Acronis ExtremeZ-IP

- Reduced costs as the same IT administrator can now support both Windows and Mac environments
- Lower hardware costs as you eliminate the need for Mac servers and infrastructure to support Mac users
- Significantly decreased help desk
- Leverage Windows file servers as the target drives for Mac's Time Machine backups
- Improve end user productivity with simple, no-nonsense fully Mac-compatible file server access
- Find files fast -- and even leverage Mac's built-in Network Spotlight to

- calls by as much as 40%
- Minimized downtime due to server restarts
- Save on storage and reduce backup time as you keep undesirable files (e.g. MP3s) off servers with filename policies
- Deliver enterprise-class IT services such as, DFS, Active Directory, instant search and virtualization to Mac users
- help find files even faster
- Improve collaboration between Windows and Mac users
- Easily access Microsoft DFS (Distributed File System) files
- Enjoy single-sign on capability to all Windows-based systems

Requirements

Achieve Enterprise Harmony: One Secure Network Serving Mac and PC computers
Take a closer look "under the hood" of **ExtremeZ-IP**, the most trusted solution for complete compatibility between Mac desktops and Windows servers. While the following are minimum systems requirements, the recommended systems requirements for a particular implementation or application can vary.

- **File & Print Server**

- Windows Server Platforms: 2012 (inc. Essentials), 2008 (inc. R2), 2003 (inc. R2), Windows Storage Server, Windows Powered NAS*
 - Not compatible with: Windows Small Business Server 2011 Essentials
- Minimum processor - Pentium 4; Minimum RAM - 1 GB
- Switched TCP/IP based network provides best performance - 100BaseT or 1000BaseT
- ExtremeZ-IP volumes must be on NTFS formatted drives

- **File Server Client**

No additional software is installed on the client for file sharing.

- Mac OS Classic
- Mac OS X
 - Mac OS X 10.2.3 or later supported
 - Mac OS X 10.3 or later recommended
 - Mac OS X 10.3.5 or later recommended for single sign-on / Kerberos support
 - Mac OS X 10.4 or later required for Zidget support
 - Mac OS X 10.5 or later required for DFS and Network Spotlight support

AppleTalk support not available on Windows XP Pro. For file servers, AppleTalk is used by the Chooser on Mac OS 8/9 to discover servers, but alternative TCP/IP based methods exist.

● Print Server Client

- Optional for basic printing, required for Print Accounting feature
- Mac OS Classic
 - Mac OS 9.0 or later
- Mac OS X
 - Mac OS X 10.3 or later recommended
 - Mac OS X 10.4 or later required for Zidget support
 - Print Accounting is not compatible with applications running in 64-bit mode on Mac OS X 10.6
