Acronis Snap Deploy 5

Acronis

Acronis is a leading provider of easy-to-use disaster recovery and data protection solutions for physical, virtual and cloud environments. Its patented disk imaging technology enables corporations, SMBs and consumers to protect their digital assets. With Acronis' disaster recovery, deployment and migration software, users protect their digital information, maintain business continuity and reduce downtime. Acronis software is sold in more than 90 countries and available in up to 14 languages.

The rise of virtualization, the explosion of data creation and the opportunities Cloud services offer are bringing new challenges to maintaining effective backup and disaster recovery programs for critical data.

Acronis can help you securely migrate, protect and recover critical data wherever it resides in your physical, virtual or cloud environments. With a Unified Platform and next generation technology, its innovative solutions are designed to ease the management burden and reduce total cost of ownership, while improving your recovery time objectives.

Acronis Snap Deploy
Fast, Easy System Deployments
for Multiple PCs and Servers

Acronis Snap Deploy 5

Acronis® is pleased to **pre-announce the launch of Acronis Snap Deploy 5**. Ideal for rapid bare-metal initial deployments to a large number of workstations and servers, and on-going deployment to the same hardware in education, training, and lab environments, **Acronis Snap Deploy** lets you provision hundreds of workstations and servers as fast as you can provision one.

Top business benefits include improved IT productivity with mass provisioning and machine-specific configuration management; fast machines re-deployment to refresh or change configurations in a class, lab, R&D, or test environment and the ability to run scheduled deployments without IT staff monitoring.

What's New?

- ✓ 2 times faster deployment

- ✓ Windows® 8.1/2012 R2 support
- ✓ Includes Acronis Universal Deploy
- ✓ Windows tablet and Linux enhanced deployment
- ✓ Support of images prepared with Sysprep
- ✓ Site licensing option
- ✓ Support for master images created by Acronis Backup/ Backup Advanced products
- ✓ Back up any server role in a SharePoint farm with just one backup
- ✓ Single-pass backup for SharePoint content (SQL Server) databases
- ✓ Any type of recovery – server, disk, file, database, site content – from a single backup

Product Overview

Ideal for rapid bare-metal initial deployments to a large number of workstations and servers, and on-going deployment to the same hardware in education, training, and lab environments, **Acronis® Snap Deploy® 5** lets you provision hundreds of workstations and servers as fast as you can provision one.

Powered by the Acronis AnyData Engine, award-winning disk imaging technology lets you create an exact disk image of any standard configuration you choose - including the operating system, configuration, files, and all applications - and simultaneously deploy the image to multiple machines in one easy step. Acronis® Snap Deploy® will also automatically manage machine-specific configurations.

Acronis Snap Deploy 5 includes **Acronis Universal Deploy**, which lets you deploy the same image to other brands and types of PCs and servers.

Available in 2 versions: Acronis Snap Deploy for Workstation (5) and Acronis Snap Deploy for Server (5).

Acronis Snap Deploy

Katso myöhemmin Jaa

Business Benefits

- **Improve IT productivity** by eliminating the need to manually install operating systems and applications onto individual machines.
- **Save additional time** by eliminating the need to manually configure machines with each deployment.
- **Rapidly re-deploy machines** when required to refresh or change configurations in a class, lab, or R&D, or test environment.
- **Run scheduled deployments** without IT staff monitoring.

Key Features

- **Ease of use:** A simple and intuitive user interface saves time and reduces errors.
- **Deploy multiple operating systems:** Acronis Snap Deploy provides flexibility, letting you deploy Windows Server®, PCs, Windows tablets, and Linux.
- **High-speed dispatch:** From a central administration point, you can rapidly deploy a single image to multiple PCs or servers via unicast or multicast.
- **Flexible deployment options:** You can choose from 4 deployment options including manual, automatic, user-initiated, and scheduled deployment. You can deploy a standalone image even if your system is not on a network
- **Deploy anywhere:** With Acronis Universal Deploy, which is included in the product, you can deploy the same image to different hardware, even to multiple different Intel-based machines at the same time.
- **Machine-specific configurations:** You can assign individual settings to each PC or server to ensure they all receive an appropriately tailored configuration. You can monitor the progress and status with a convenient 'new machines' list and pre-configure new machines identified by their MAC address.
- **Flexible licensing:** Licensing options include per-deployment, per-machine, and the new site license for large installations.

Requirements

Acronis Snap Deploy® 5 can be installed on:

- Microsoft Windows Server 2012
- Microsoft® Windows Server® 2008 / 2008 R2
- Microsoft Windows Small Business Server 2011 Standard

Microsoft Windows Server 2003 / 2003 R2

- Microsoft® Windows® 8
- Microsoft® Windows® 7
- Microsoft Windows Vista
- Microsoft Windows XP

The following Operating Systems are supported for deployment:

- Microsoft Windows 8 / 7 / Vista / XP
- Microsoft Windows 2000 Professional
- Microsoft Windows 98/ME/NT
- Microsoft Windows Small Business Server 2011 Standard
- Microsoft Windows 2000 Server
- Microsoft Windows Server 2003 / 2003 R2
- Microsoft Windows Server 2008 / 2008 R2
- Microsoft Windows Server 2012
- Linux

File systems

- FAT16 / FAT32
- NTFS
- Ext2 / Ext3 / Ext4
- RaiserFS
- Raiser4

Master images can be stored on one of the following devices:

- Local folder (HDD)
- Network share
- Removable storage devices such as CD/DVD or flash drives

The PC version can deploy images of workstation Operating Systems only. For more information refer to KB article <http://kb.acronis.com/content/25215>

Additionally Acronis Snap Deploy supports deployment of images with any file system in sector-by-sector mode.
