Acronis Backup for Office 365

Acronis

Acronis sets the standard for hybrid cloud data protection through its backup, disaster recovery, and secure file sync and share solutions. Powered by the Acronis AnyData Engine and set apart by its image technology, Acronis delivers easy, complete and affordable data protection of all files, applications and operating systems across any environment—virtual, physical, cloud and mobile. Founded in 2003, Acronis protects the data of over 5 million consumers and 500,000 businesses in over 145 countries. With more than 100 patents, Acronis products have been named best product of the year, and cover a range of features, including migration, cloning and replication. Today, Acronis solutions are available worldwide through a global network of service providers, distributors and cloud resellers.

Acronis Backup

JUST UPDATED

Protect Microsoft Office 365 Mailboxes with Acronis Backup

Built-in Office 365 backup functions may be not enough for reliable data restore. Your retention and recovery capabilities may not meet your expectations. Acronis Backup protects your organization's Office 365 mailboxes by putting a copy of your data under your control to local storage or to reliable Acronis Cloud Storage. Recover mailboxes at a granular level or search and preview backups right in the management console and recover only the email you need.

Protect Your Users' Email Experience

Recover Office 365 mailboxes and individual emails, calendars, tasks, and contacts

directly from your Office 365 backup — anywhere, anytime — with no extra steps or third-party tools required

Enjoy Easy-to-Use Data Protection

Manage data backup and recovery with Acronis' web-based management console and protect hundreds of mailboxes with backup policies, customizable dashboards, and advanced alerting and reporting

Choose from a Variety of Flexible Storage Options

Control your Office 365 data by storing your backups in on-premises disk storage, Network Attached Storage (NAS), Storage Area Network (SAN), tape devices, or secure and reliable Acronis Cloud Storage

Improve Corporate Compliance

Protect all user emails and improve corporate compliance with comprehensive, on-premises and cloud backup that complements the built-in basic snapshot and undelete features of Office 365

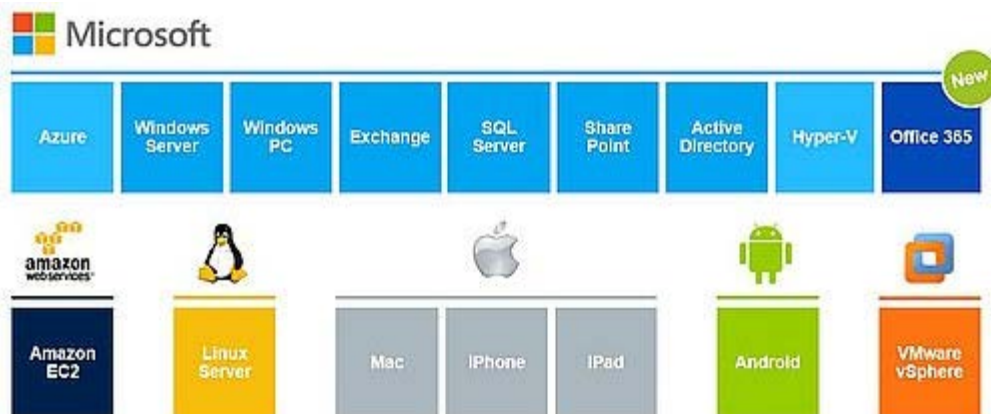

Safeguard Everything Microsoft

Protect your entire Microsoft cloud and on-premise stack with one solution, including Microsoft Azure Virtual Machines (VMs)

Acronis Backup is the only hybrid cloud solution with cloud-based SaaS and on-premise backup software all-in-one that gives you the power to:

- Manage all their backups and systems with **one console**
- Recover systems in **15 seconds** with Acronis Instant Restore
- Back up Microsoft Office 365, Azure VMs, and Amazon EC2 **instances**
- Back up Windows PCs, Mac, iPhone, iPad and Android **devices**
- Back up VMware ESXi and Hyper-V hosts, **not just VMs**
- Control their **data, backups and systems**

You can now protect Office 365 and 15 more platforms.

Protect Microsoft Office 365 Mailboxes with Acronis Backup – Up to 55% discount

Promotion

- 55% discount on 1 year Subscriptions of Acronis Backup for Office 365.

- Offer valid **until December 31st, 2018**.
- Cannot be combined with other promotions.
- Promotion only applies to Acronis new business deals, not maintenance renewals or upgrades.
- At the time of the subscription renewal, customer will need to pay full price of the subscription Renewal.
- Promotion valid in the countries of: Belgium, Luxembourg, Netherlands, Denmark, Finland, Norway & Sweden

Acronis Backup

The Best Backup for Microsoft Office 365®.

Now with Centralized Management!

- **Fast** – Back up and recover quickly with a solution that is 2X faster than the closest competitor
- **Easy** – Install in a few clicks and back up to local and cloud storage
- **Complete** – Protect 16 platforms, including Office 365 and more
- **Safe** – Choose one of 4 encryption standards
- **Modern** – Protect your cloud – Office 365, Azure®, Amazon EC2®, and more

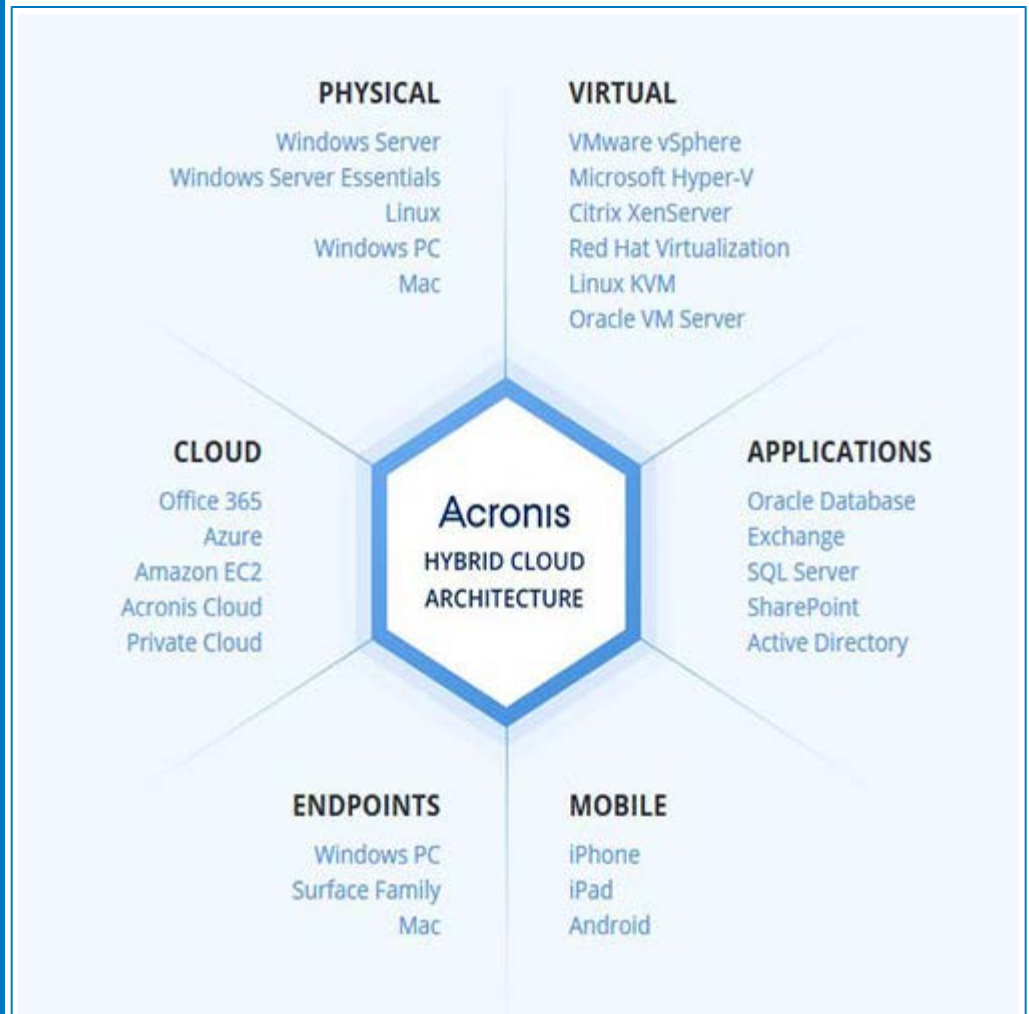

New and Improved Features in Acronis Backup Update 2

- Simplified deployment with All-in-One VMware appliance
- Improved scheduling for laptop backups
- Double protection for your most critical data

- Simplified deployment with the new self-contained All-in-One VMware appliance with prepackaged CentOS, Management Server, Virtual Appliance and Backup Console
- Improved scheduling for laptop backups on battery, Wi-Fi, VPN and prevention from sleeping
- Double protection for your most critical data with 5GB of free cloud storage
- Faster restore for your mails: Office365 to Exchange Server Mailbox Recovery and vice-versa
- Native Integration of Acronis Storage and Acronis Backup enables backup to Acronis Storage and geo-replication
- Simplified migration from Veeam eases upgrade to Acronis

Security improvements for Linux systems: Admin roles and non-root account logon for Acronis Management Server

- Support for macOS 10.13 High Sierra

Key Features:

New and Exclusive

Cloud and Local Web Console

A unified web-based console centralizes the management of all backup plans and reduces IT workload. Accessible from any device and touch-friendly.

Note: Cloud Console is available with Subscription Licenses only.

New

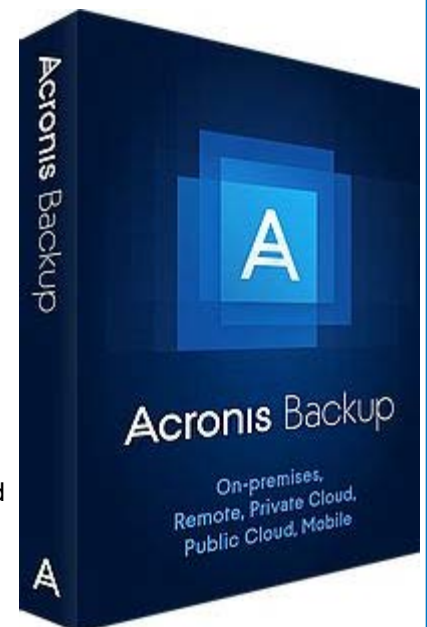

Cloud and On-Premise Storage

Back up your Office 365 mailboxes to your on-premise storage, including NAS (Network Attached Storage) and SAN (Storage Area Network), and to reliable and secure Acronis Cloud Storage.

New

Easy Granular Recovery

Restore Office 365 mailboxes, and individual emails, calendars, tasks, and contacts directly from your Office 365 backup — no extra steps or third-party tools required!

New and Exclusive

Search and Preview

Search emails by subject, sender, recipient, and date ranges before you recover; even preview emails so you can be sure they are exactly what you need to recover.

New and Exclusive

Complete Cloud Protection

Protect your Office 365 mailboxes, Microsoft Azure VMs, and Amazon EC2 cloud workloads. Migrate workloads easily between various clouds, virtual systems, and physical machines (P2C, V2C, C2C, C2V, and C2P).

Safe Solution with Encryption

Choose one of four encryption standards for in-flight and at-rest encryption and password protection. Control your infrastructure with alerting and email notifications.

New and Exclusive

Physical, Virtual, Cloud, Applications, Mobile

Acronis Backup is the world's first backup solution that protects your physical Windows® and Linux® servers; virtual Microsoft Hyper-V and VMware vSphere®; cloud Microsoft Office 365 mailboxes, Azure VMs, and Amazon EC2 instances; Microsoft Exchange, SQL Server®, SharePoint®, and Active Directory® applications; Windows PCs, and Mac® computers; and iPads®, iPhones®, and Android® devices.

Acronis Cloud Storage

Acronis Backup provides direct access to secure, offsite cloud backup in the Acronis cloud. Simply add an Acronis Cloud Storage subscription to your purchase to fortify your backup storage plan and enhance your data protection.

Acronis Backup 12.5 - Easy Backup Solution

Katso myö

Did you know?

- The average cost of data center downtime is \$5,600/minute
- 21% of all critical data loss is caused by hardware failure
- 60% of companies close within 6 months of a data disaster
- 65% of sensitive small business data is not encrypted or otherwise safeguarded

Don't stress out—eliminate downtime & restore data instantly with Acronis Backup!

- Protect **any data in any location**—local/remote, private/public cloud & mobile devices
- Safeguard **15 different platforms** with 1 solution, including:

- **Operating systems:** Microsoft Windows
- **Storage:** Local Disks, Networked Storage Devices, Acronis Cloud Storage, Microsoft Azure Storage
- **Web Browsers:** IE, Edge, Chrome, Firefox, Opera, Safari

Acronis Backup 12.5 Demo Video: Connecting Acronis Agent

Frequently Asked Questions:

Q: Is there a backup or archive solution for Office 365 mailbox?

A: Acronis provides comprehensive data protection and recovery solutions for Microsoft Office 365 to help your users remain productive and protect their Office 365 mailboxes. With Acronis Backup 12.5, you can quickly implement, enjoy quick backup speeds with multi-streaming, encrypt data in transit and at rest, search and preview emails in a touch friendly, mobile-enabled web console, and recover individual emails, calendars, tasks, and contacts directly from your backup.

Q: How do I back up my Office 365 mailbox to a local computer?

A: To back up and recover Office 365 mailboxes, you must be assigned the global

administrator role in Microsoft Office 365 and have the Acronis Backup 12.5 Agent for Office 365 installed on a Windows machine that is connected to the Internet. Once completed, you simply sign in as a global administrator to Microsoft Office 365, select the mailboxes that you want to back up, and click Backup. To select a backup location, click Where to back up, select a previously used, predefined backup location, or click Add location to specify a new backup location.

You can then choose to back up to cloud storage, a local or network folder, Network File Storage (NFS), a Secure Zone, or a Shared File Transfer Protocol (SFTP) location. With Acronis Backup 12.5 Advanced, you can also back up to a storage node or tape device. By default, backups are performed daily, Monday to Friday. You can select the time to run the backup and can schedule a backup to run by events, instead of by time.

Q: How do I make scheduled backups of Office 365 mailbox?

A: With Acronis Backup 12.5, the scheduling parameters depend on the backup destination. For example, if you are backing up to cloud storage, backups are performed daily — Monday to Friday — by default. You can select the time to run the backup and you can easily change the backup frequency.

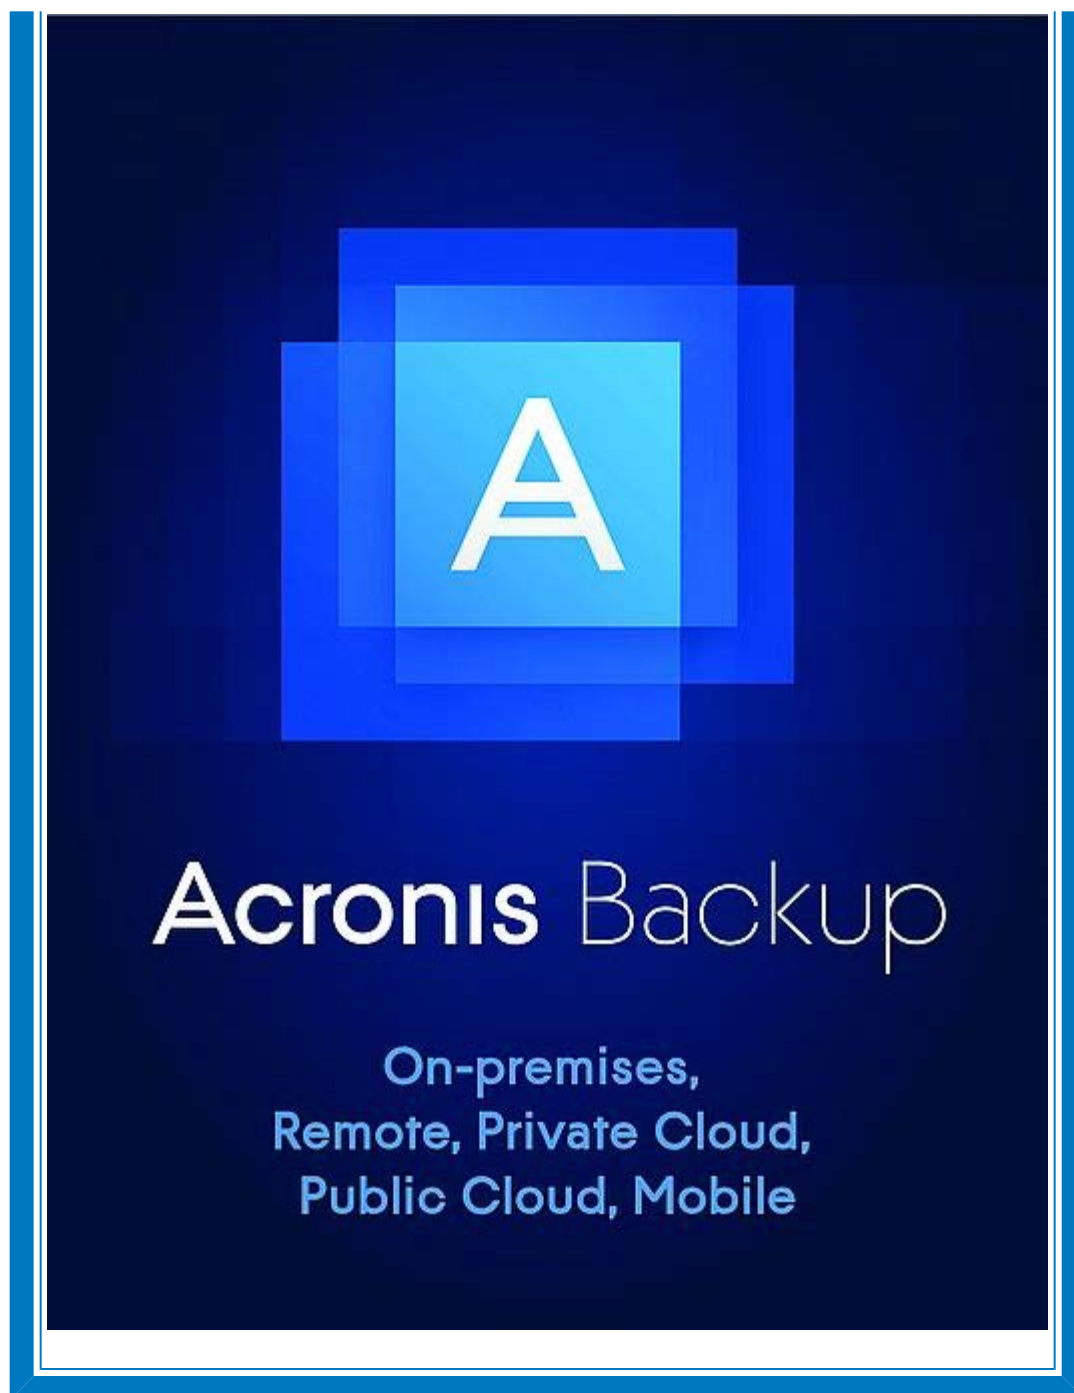

You can also change the backup schedule to run by events instead of by time. When setting up a schedule for a backup plan, you can select the event and the backup will be launched as soon as the event occurs. These events include: upon X time since last backup, when a user logs onto the system, when a user logs off the system, on the system startup, on the system shutdown, and on Windows Event Log event.

The first backup is full, which means that it is the most time-consuming. All subsequent backups are incremental and take significantly less time. You can choose to encrypt backups and can specify additional scheduling options, such as the backup start conditions, setting a date range for when the schedule is effective, and so on.

Q: How do I recover an email that a user accidentally deletes?

A: It is easy to recover an email that a user deletes using Acronis Backup 12.5. Start by clicking Microsoft Office 365 in the Acronis console, select the mailbox that originally contained the items that you want to recover, and then click Recovery. You can search mailboxes by name and if the entire mailbox was deleted, you can select it on the Backups tab, and then click Show backups. Select a recovery point and click Recover > Email messages. You can now search for the email that you want to recover by subject, sender, recipient, or date. When an email message is selected, you can click Show content to view its contents, including attachments. You can also click the name of an attached file to download it.

When an email message is selected, you can send it as an email, which is sent from the administrator account's email address. To select folders, click the "recover folders" icon and click Recover, specify the target mailbox, and click Start recovery.
